

About Introduction General Analysis Comparative Analysis Detailed Analysis Conclusions Acknowledge

Conclusions

- ✓ January is the month with more incidence in layoffs during the pandemic and post-pandemic period.
- ✓ Layoffs frequency intensified during the last midterm of 2022 and the beginning of 2023, as the sanitary emergency stabilized.
- ✓ Retail, Consumer, Transportation, and Food industry sectors present the highest number of laid off professionals.
- ✓ Some of the most relevant technological transfers occurred during the last three years
- ✓ Relative Employee Efficiency is presumably on the lower side.
- ✓ Amazon is the company with the highest accumulated revenue
- ✓ between 2022-2023, however along with Meta and Google, it is among the top 3 companies in employees cuts during the pandemic and post-pandemic period.

Future Work:

Analysis of geopolitical factors over employee cuts, and time series autoregressive models of layoffs, should be considered for future work.
